ABOUT

I'm a Computer Engineering undergraduate focused on software development and problem solving. I have a growing interest in Machine Learning, AI tools, and LLM technologies and I try to reflect this in my projects wherever I can. I enjoy building practical things and learning by doing.

EDUCATION

Fevzi Çakmak Anatolian High School *2021*
Graduated 1st in class

Karabük University *2021 – Present*
B.Sc. in Computer Engineering (3rd year)

EXPERIENCE

Google Developer Student Clubs – Karabük *2023 – 2024*
Social Media Coordinator

- Helped organize community events and meetups alongside the core team
- Coordinated social media for 5+ events

Google Developer Groups on Campus – Karabük *2024 – 2025*
Social Media Team Lead

- Built and managed the social media team
- Planned and ran campaigns that grew the community reach and event attendance
- Worked closely with the core team to organize tech talks and workshops
- Coordinated social media for 10+ events

PROJECTS

PetCare – Pet Management Desktop App

- Windows Forms application for pet owners with vaccine tracking and weight monitoring
- Includes graphical weight charts and a database-backed record system
- Developed in C# with .NET Framework

Data Transmission Simulator

- Implemented error detection algorithms (Parity, CRC-16, Hamming Code) over TCP in Python algorithm performance under simulated packet loss conditions

Console Task Manager

- Command-line to-do application built in Java
- Supports adding, listing, and deleting tasks from the terminal

Titanic Survival Prediction

- Built a Random Forest model to predict passenger survival using Kaggle's Titanic dataset
- Handled missing data, encoded categorical features, and visualized feature importances
- Achieved 97.9% training accuracy using scikit-learn

TECHNICAL SKILLS

Languages: Python, Java, C#, JavaScript, HTML/CSS, SQL, C

Tools & Platforms: Git, GitHub, Google Cloud, Visual Studio, VS Code

Frameworks: .NET (Windows Forms)

Exploring: Neural Networks, NLP basics, Machine Learning

CERTIFICATIONS

Generative AI Learning Path *Google*

- Completed Google's learning path covering generative AI concepts and applications

LANGUAGES

Turkish: Native **English:** Advanced
